Burt Colucci  
14 May at 1:16 am

White brothers and sisters, your information is not secure. Any and all individuals have been court ordered to handover all electronic devices that are named in the Charlottesville lawsuit. Most of these groups\individuals have already submitted all of their electronic devices, VK login information and email account logins in order to comply with the federal court order. This is the entire reason I have insisted on not collecting anybody's information that joins the NSM. I am not named as a defendant in that lawsuit and do not have to answer to uncle Zog, nor can I be at this point because I was not there.

And yes, that also includes former Commander Jeff Schoep and is one of many reasons I am in charge of the NSM now and he is not. I and I alone am the only person for the last two years that has had access to any and all NSM sensitive material. Judge Hoppe has insisted that these records are sealed, but there is absolutely nothing to stop either himself or another judge at a later date from unsealing them. Join a secure organization, you have been warned.
